## DETAILED ACTION

### *Specification*

1. The disclosure is objected to because of the following informalities: In the Cross-Reference to Related applications on page 1, please update status of applications where required. Appropriate correction is required.

### *Double Patenting*

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

3. Claims 55-81 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 55-81 of copending Application No. 10/357,293 (allowed). This is a provisional double patenting rejection since the conflicting claims have not in fact been patented. The claims 55-81 of both applications are identical to each other.

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground

provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 55,61 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 22 of U.S. Patent No. 6387457 in view of Coates WO 97/30136.

3. Claim 22 of US'457 cites applying a patterned binder to a substrate; applying a dry pigment of non-metallic reflecting flakes (CLC is a non-metallic reflecting flake), and mechanically aligning the flakes (same as claim 61 of instant claims). Applying is by a xerographic printer per instant claim 55. The sole difference is that US'457 recites flakes having an average particle size less than about 100 microns. However, Coates expressly teaches that such flakes/platelets of less than 100 microns are formed (bottom, page 24) which are applied to a substrate and sheared to cause alignment (page 25, 12-20) thereon. Thus, claims 55,61 of the instant application are obvious variations of claim 22 of US'457 in view of Coates.

4. Claims 55 to 81 distinguish over the prior art which do not teach nor suggest to print a dry pigment material comprising flakes of a CLC material to a patterned binder on a substrate, the printing means being at least a xerographic or laser printer. US 5457554, 5364557, and 5599412 illustrate the state of the art which prints liquid inks containing pigments flakes including a CLC material.
